

WE NEED TO TALK – ABOUT EXCELLENT FOOD PROTECTION

Our PP barrier thermoforming sheets and trays are a true masterpiece. Sophisticated, excellent to process and fully recyclable. Protect sensitive foodstuff and add value to your product.

ETIMEX PP-BARRIER TRAYS, POTS and FILMS are resistant to temperatures ranging from +2 °C to +125 °C and have a highly effective barrier against oxygen thanks to an EVOH barrier layer. Superior aroma protection and an outstanding water vapour barrier allow for a long shelf-life of the sterilised products at room temperature.

Rely on 70 years of experience and contact us!
