

## ETIMEX AWARDED ECOVADIS GOLD MEDAL

### ETIMEX PRIMARY PACKAGING AMONG 5% OF TOP-PERFORMERS

About 150 multinational companies in North America, Asia and Europe have chosen the EcoVadis solution to assess and monitor the CSR performance of their suppliers. The aim is to continuously improve environmental and social practices by consequently utilizing global supply chains.

EcoVadis runs the first common platform allowing companies to assess the sustainability performance of their suppliers across 150 different industry sectors and in 110 countries. CSR refers to themes related to sustainable development applied in business.

ISO 26000 defines CSR as an organization's responsibility for the impact of its decisions and business activities on society and the environment, and requires transparent and ethical behaviour when it comes to:

- > contributing to sustainable development, including the health and well-being of a society
- > meeting the expectations of individual interest groups
- > complying with applicable law and international standards of conduct
- > integrating CSR into the overall organization and implementing it with its business partners

The 6 core subjects defined in ISO 26000 are:

- > human rights
- > labour practices
- > environment
- > fair business practices
- > consumer issues
- > community involvement and development
